

# Contents

<b>1</b>	<b>Introduction</b>	<b>2</b>
1.1	Problem Identification . . . . .	2
1.2	Problem Delimitation . . . . .	2
1.3	Objective and Approach . . . . .	2
<b>2</b>	<b>Theoretical Foundations</b>	<b>2</b>
2.1	Game Theory . . . . .	2
2.2	Prisoner's Dilemma . . . . .	2
2.3	Advanced Variants . . . . .	2
2.4	Current Findings . . . . .	2
2.5	Relevance to the Project . . . . .	2
<b>3</b>	<b>Methods and Implementation</b>	<b>2</b>
3.1	Programming Language . . . . .	2
3.2	Programme Structure . . . . .	2
3.3	Data Generation . . . . .	2
3.4	Implemented Variants . . . . .	2
3.5	Simulated Strategies . . . . .	2
<b>4</b>	<b>Results</b>	<b>2</b>
4.1	Variant 1 (Iterated) . . . . .	2
4.2	Variant 2 (Continuous) . . . . .	2
4.3	Variant 3 (Evolution) . . . . .	2
<b>5</b>	<b>Discussion</b>	<b>2</b>
<b>6</b>	<b>Conclusions and Outlook</b>	<b>2</b>
6.1	Summary and Quintessence . . . . .	2
6.2	Application in the Real World . . . . .	2
<b>7</b>	<b>Self Reflection</b>	<b>2</b>
7.1	Challenges . . . . .	2
7.2	Learnings . . . . .	2
<b>8</b>	<b>Annex</b>	<b>2</b>
